

San Tan Learning Center

STRIVING FOR EXCELLENCE, FOSTERING THE IMAGINATION

San Tan Learning Center has a unique motto for a school; "People, Process, and Possibilities." They believe enrollment begins with a relationship with each family and child, and they have clear and effective structures in place to reach their goals and to value the process of learning. The approach is empowering, "We ask that all involved in the care of our students do not do anything for the child that the child could do for themselves with a little planning, effort and patience," says Kristofer Sippel, Principal of the school. He adds, "Children develop with this approach an "I can" attitude that we believe

will propel each child confidently through their educational career that has begun in our Montessori preschool."

At San Tan Learning Center planning and goals are developed one family at a time. It's a highly individualized approach, Kristofer continues, "This gives us an opportunity to get to know each child and proactively prepare the environment for them by adding something that may be meaningful to that child and interest the child in the environment immediately," Kristofer goes on to share that ongoing interaction, communication, and feedback between parents, students, and educators is integral to assuring the best and most productive learning.

San Tan Learning Center, a small Montessori Preschool and K - 6th Charter school in the Southeast Valley, is dedicated to providing a safe nurturing environment for your child with highly qualified administrators and teachers, and many opportunities for significant learning extensions for children and parents; such as P.E, Health, Music, and Spanish.

At a young age, children's personalities flourish in their carefully prepared, developmentally appropriate, and fun learning environments. San Tan Learning Center accomplishes this through observant and responsive instructional leadership, strategic and focused ongoing professional development of staff, and an 'Inquiry Based' instructional model that prepares for and supports students' learning activities. Students are made responsible and held accountable for their learning at every level.

Kristofer shares that the importance of continuous improvement, ongoing development, and purposefulness drive the educational process at San Tan, "We ask ourselves in everything we plan and do at San Tan, 'What is the value? Is this a helpful/useful activity to the development of the child?'" It's that special attention and careful planning that truly sets this school apart, an education specifically planned and crafted to your child's needs and interests.
